CONTENTS

NUMBER 1

ZENG DECHAO and YAO YUSU: Investigation on the relationship between soil shear strength and shear rate 1

J. M. FIELKE and T. W. RILEY: The Universal Earthmoving Equation applied to chisel plough wings 11

H. RAHEMAN: A laboratory investigation into the effects of pressurised air on the erosion of wet soils by air cushion vehicles 21

SHIN-MIN SONG and YAW-DONG CHEN: A free gait algorithm for quadrupedal walking machines 33

J. A. LINES and K. MURPHY: The stiffness of agricultural tractor tyres 49

N. ITO: Bulldozer blade control 65

J. G. HETHERINGTON: Electric, all-wheel drive, tracked vehicles 79

NUMBER 2/3 SPECIAL ISSUE: BREAKING NEW GROUND

S. HATA 87

R. D. WISMER: Science, engineering and soil measurement 89

K.-J. MELZER: Breaking new ground? . . . 93

YU QUN: Terrain evaluation—I 115

H. MURAKAMI: Terrain evaluation—II . . . 123

A. OIDA: Diversification and sophistication . 137

A. E. HASSAN: Vehicle and machinery design 151

CONTENTS (continued)

K. OHMIYA: Fractal dimensions of terrain profiles 155

G. J. IRWIN, A. M. O. MOHAMED, S. ALAMMAWI and R. N. YONG: Prediction of load carrying capacity of deep snow by Rammsonde hardness 167

M. FUKUE, T. KOBAYASI and T. NAKAMURA: Terrain evaluation under water. . . . 177

S. SASAKI, T. YAMADA and E. MIYATA: Articulated tracked vehicle with four degrees of freedom 189

K.-J. MELZER and W. KÖPPEL: Analytical simulation as a support tool in the decision process "wheels or tracks" 201

D. A. CROLLA: Soil tank measurements of tyre lateral and longitudinal forces . . . 211

J. A. LINES and K. MURPHY: The radial damping of agricultural tractor tyres . . . 229

T. MURO: Optimum track belt tension and height of application forces of a bulldozer running on weak terrain 243

NUMBER 4

J. Y. WONG: Some recent developments in vehicle–terrain interaction studies . . . 269

D. GEE-CLOUGH: Soil–vehicle interaction (B) 289

A. G. M. HUNTER: Soil–vehicle interaction (C) 297

H. SCHWANGHART: Measurement of contact area, contact pressure and compaction under tires in soft soil 309

A. OIDA, A. SATOH, H. ITOH and K. TRIRATANASIRICHAI: Three-dimensional stress distributions on a tire–sand contact surface 319

CONTENTS (continued)

K. ARMBRUSTER and H. D. KUTZBACH: Combined lateral and longitudinal forces on driven angled tractor tyres 331

M. GRAHN: Prediction of sinkage and rolling resistance for off-the-road vehicles considering penetration velocity 339

S. HATA and K. TATEYAMA: Theoretical approach to impact soil compaction through plastic wave propagation 349

Y. NOHSE, K. HASHIGUCHI, M. UENO, T. SHIKANAI, H. IZUMI and F. KOYAMA: A measurement of basic mechanical quantities of off-the-road traveling performance . . 359

O. A. ADEBIYI, M. KOIKE, T. KONAKA, S. YUZAWA and I. KUROISHI: Compaction characteristics for the towed and driven conditions of a wheel operating in an agricultural soil 371

M. A. FODA: On the prediction of drawbar pull–normal slip relationship for a pneumatic tyre moving on soft soil 383

H. R. KEMP: Relative contribution of different wheels of four-wheel-drive vehicles . . . 393

An unfortunate error! I
